PRICE STABILITY & SUPPLY STRUCTURE

FAITH operates under a non-inflationary fixed supply model.
No additional tokens can ever be minted.

To make it suitable for traditional investors:

1. Treasury stabilization reserve

2. Revenue-backed buyback

3. Controlled emission schedule

4. No unlocked dumping supply

5. Transparent vesting dashboard

6. Predictable token economics

7. Long-term scarcity

8. Strong Value Preservation

9. Sustainable ecosystem growth

10. Transparent Supply Mechanism

UTILITY FRAMEWORK

FAITH Token functions as the foundational economic layer of the Faith Protocol ecosystem.

1. ECOSYSTEM ACCESS

Used for platform services, digital asset participation, and ecosystem upgrades.

2. DIGITAL LAND & ASSET UTILITY

Required for virtual land acquisition, NFT asset development, and ecosystem-based transactions.

3. STAKING & YIELD PARTICIPATION

Users may stake FAITH to participate in controlled reward programs governed by emission rules.

4. GOVERNANCE

Token holders may vote on:

| Protocol upgrades | Treasury utilization | Ecosystem proposals | Partnership approvals

VESTING & TRANSPARENCY

TO PROTECT ECOSYSTEM STABILITY:

- ✓ Team tokens are locked with long-term vesting
- ✓ Strategic allocations are time-locked
- ✓ Liquidity is secured
- ✓ Treasury operations are governance-monitored
- ✓ Smart contract audits and vesting dashboards will ensure full transparency.

LONG-TERM ECONOMIC VISION

FAITH TOKEN IS DESIGNED TO SUPPORT:

- ✓ A sustainable digital economy
- ✓ Revenue-backed ecosystem growth
- ✓ Cross-platform integrations
- ✓ Institutional-grade token structure
- ✓ Traditional market alignment
- ✓ The model prioritizes stability, scarcity, and long-term value creation over short-term speculation.
